General Manager's Report *by Daryl Johnson*

Get ready for our Fourth of July festivities scheduled for Saturday July 1st!! Scheduled time for events can be found on page 3.

Hopefully we get some rain, with the drought we've been experiencing; I just hope the rain holds off for the fireworks! Rain date will be Saturday, July 8th if Mother Nature decides to throw us a curve ball.

You may have noticed a blue hue to the water in the lakes. This is due to chemicals being added by our new lake treatment specialist, w/ Jeff Hoffman Pond management, whom the Board elected to hire in treating our lakes for the next year. The dye is supposed to reduce the amount of sunlight that penetrates the water; thus reducing the amount of weed growth, without harming the fish. Speaking of fish...check out the results of our Fish Shocking survey found on page 9!

To put the rumor mill to rest, I just want to confirm that the Board has elected to pursue New Management for the Association, and I have accepted their offer to stay-on in the meantime; either until they find a replacement, or until I find another position elsewhere. It has been my pleasure serving this community for the past nearly 5 years. This is a wonderful community that I have been proud to manage; and I wish you all success in the future!

Sincerely,

-Daryl

The Fish Shocking survey conducted last week by Herman Brothers went extremely well, with the picture to the left showing some of the quality fish that were weighed, measured; and then released back into the Upper lake.

Results of the survey can be found on Page 9.

Pictured are those that helped conduct the survey, from left to right:

Jerry Tuzil, Mike Decesari, (Unknown employee of Herman Bros.), and Scott Pedigo.

July 1st (w/raindate 7/8)

(See page 2 for event schedule)

The Lake Camelot Sportsman's Club 2023 Bass Tournament Schedule

July 9th

August 6th

September 17th

&

Jim Modglin Tournament

September 24th

Start Times & Lake Being Fished-TBD

Results of Fish Shocking Survey Conducted this past month:

Lower Lake

Roughly 50 acres - Clear water - Limited Fish Habitat

Lots of 14-16" bass with 90% relative weights, but not many larger or smaller...

Big bluegill and redears with great relative weights but low on smaller ones...

Crappie 7-9" mostly... but historically some big crappie...

Most of the forage in the lake (small fishes 1-4") has been gobbled up and will just now during spawning season start to rebuild and feed the predators for this summer... the lake will have good forage for the next 6 months but ideally you want forage available 12 months, not just for 6 months... A few bullhead and one large catfish were also observed...

The overall fishing outlook for this season looks fantastic! The average fisherman should catch plenty of above average size bluegill, redear, and nice 14-16" (1.5-2.5 lbs) largemouth bass in 2023! To go along with lots of smaller crappies.

Upper lake:

Very similar in size to the lower lake. -Traditionally clear water but green algae bloom today...
Some very mucky leafy coves... Filamentous algae bloom covering more than usual.

Bluegill population much more diverse than lower lake with a good population of all sizes!

Crappie seem to be much better average size than lower lake in the 10-12" range.

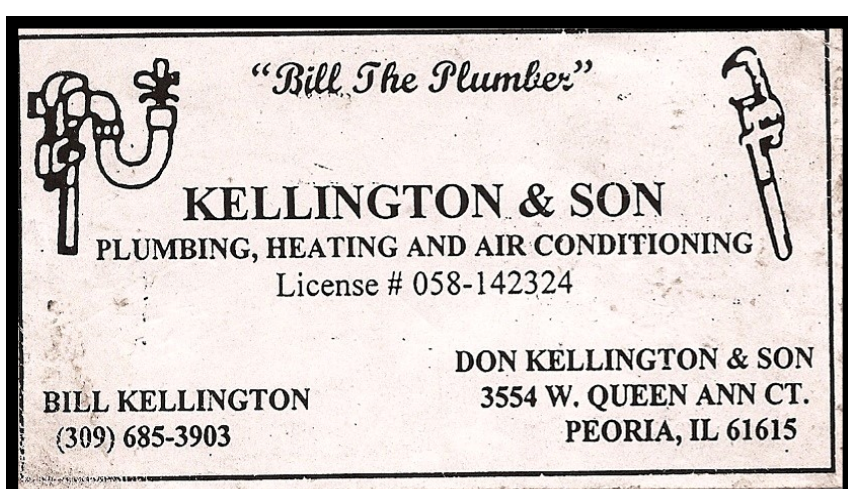

Bass population very diverse as well with a high population of 3-5 lb fish 18-20" in addition to very nice 14-16" bass with great relative weights!

A few bullhead and one walleye 17" was also tagged and observed.

Summary: You guys have above average fishing lakes and it's surprising more people don't talk about your fishery around the area or the state!! I hear about everyone's fisheries all the time but was genuinely surprised at the caliber of your fish!

Thanks!!

Austin Bennett – Fisheries Biologist w/ Herman Brothers Fisheries Inc.
